GitHub: github.com/singhaman5 Mobile: +91-9394570378

Skills

- **Languages**: C++, JavaScript, C, Python, Java, SQL
- **Frameworks**: React, Tailwind CSS, Node.js, Express.js
- **Tools/Platforms**: Git, GitHub/GitLab, VS Code, MS Excel, Google Colab, Docker, POSTMAN
- **Databases:** MongoDB, MySQL,
- **Data Analytics**: Power BI, Excel, NumPy, Pandas, Seaborn, Matplotlib
- **Soft Skills**: Time Management, Problem-Solving, Teamwork, Adaptability

Projects

- **TalentRadar – Student Opportunity Intelligence System:** GitHub *January 2026*
  - Designed and developed a scalable and efficient platform to aggregate student opportunities by leveraging multi-API integration and advanced web scraping techniques.
  - Ensured ~90–95% data freshness with real-time updates and improved matching accuracy by ~40% using a scoring engine.
  - Optimized backend performance using indexing and caching techniques, reducing API response time by ~30% and enhancing system efficiency.
  - **Tech:** MongoDB, Express.js, React.js, Node.js, REST APIs, Web Scraping

- **News Summarizer:** GitHub *December 2025*
  - Built an AI-powered web app that fetches live news articles and generates concise summaries using transformer- based NLP models.
  - Developed a full-stack workflow with Python, Flask, HTML, CSS, and JavaScript, ensuring reliable data flow, clean UI rendering, and smooth user interactions.
  - Integrated Torch-backed inference, including text preprocessing, summary generation, and post-processing pipelines for fast, high-accuracy outputs.
  - Helped users consume news 3x faster by delivering high-quality summaries from live articles in seconds.
  - **Tech:** AI/ML, NLP, Flask

- **Online Shoppers Purchasing Intention Prediction**: GitHub *October 2025*
  - Engineered a machine learning pipeline to predict purchase intent using e-commerce session data, achieving ~88–92% accuracy.
  - Optimized performance through feature engineering and benchmarking Logistic Regression, Random Forest, and KNN.
  - Applied PCA for dimensionality reduction and built a Streamlit dashboard for real-time predictions and visualization.
  - **Tech**: Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Streamlit

Training

CipherSchools: Summer Training Program (STP'25) – Data Structures & Algorithms (C++) Certificate *June 2025*

- Completed an intensive **live 6-week training program** focused on **Data Structures and Algorithms** using C++.
- Strengthened **problem-solving skills** and **algorithmic thinking** through hands-on practice.

Certificates

- Cloud Computing by IIT Kharagpur and NPTEL online certification. | *Certificate* *August 2025*
- ChatGPT Made Easy: AI Essentials for Beginners | *Udemy* *August 2025*
- Unrevealing basic Python towards ML/AI by CSE Pathshala. | *Certificate* *March 2024*

Achievements

- **Leadership and Organizational Achievements:** *February 2025*
  Led a 30+ member student club (AWSCC), organized major tech events (WEBDEV360) driving high student participation and management.
- **Qualified for the final round of hackathon:** *March 2024*
  Finalist at "HackWithVertos" 1.0 (24-Hour Hackathon), qualifying through multiple competitive rounds.

Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.61*** *Since August 2023*
- **Sarupathar H.S School** Assam, India
  Intermediate; ***Percentage: 70.4*** *April 2021 - March 2022*
- **Holy Cross high School** Assam, India
  Matriculation; ***Percentage: 89.2*** *April 2019 - March 2020*
